Hello
to children's
services

Hello to children's services

Information for patients, families and carers

We understand that learning that your child has a long-term condition can cause anxiety and be overwhelming.

We have developed the 'Hello to children's services' programme to help support parents and carers who have a child diagnosed with a long-term condition.

Who is it for?

You, if your child has been diagnosed with a long-term condition.

What is it?

A programme to help you gain knowledge and skills to manage your child's condition.

Why?

So you have the knowledge and confidence to manage your child's condition and are supported through the process.

How?

Your child's team will help you:

- **manage** your child's condition
- **learn about** their treatment
- **gain the confidence** to ask questions and be involved in decisions about their care
- know when to get help and **who to contact** in an emergency
- **stay informed** about any support networks available.

Talk to your team about how you feel and any questions or concerns you might have. Information about the programme can be found at

Ask 3 Questions*

NHS

Normally there will be choices to make about your healthcare. Make sure you get answers to these three questions:

What are the **options** for my child?

What are the **pros and cons** of each option for my child?

How do I get **support** to help me make a decision that is right **for my child**?
